

Data Flow Diagram

Date	29 June 2026
Team ID	
Project Name	RISING WATERS
Maximum Marks	2 Marks

Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	A person, organization, or system outside the project that sends or receives data (e.g., Customer, Payment Gateway).
Rectangle with numbered header	Process	An activity that transforms incoming data into outgoing data (e.g., Validate Request, Process Order).

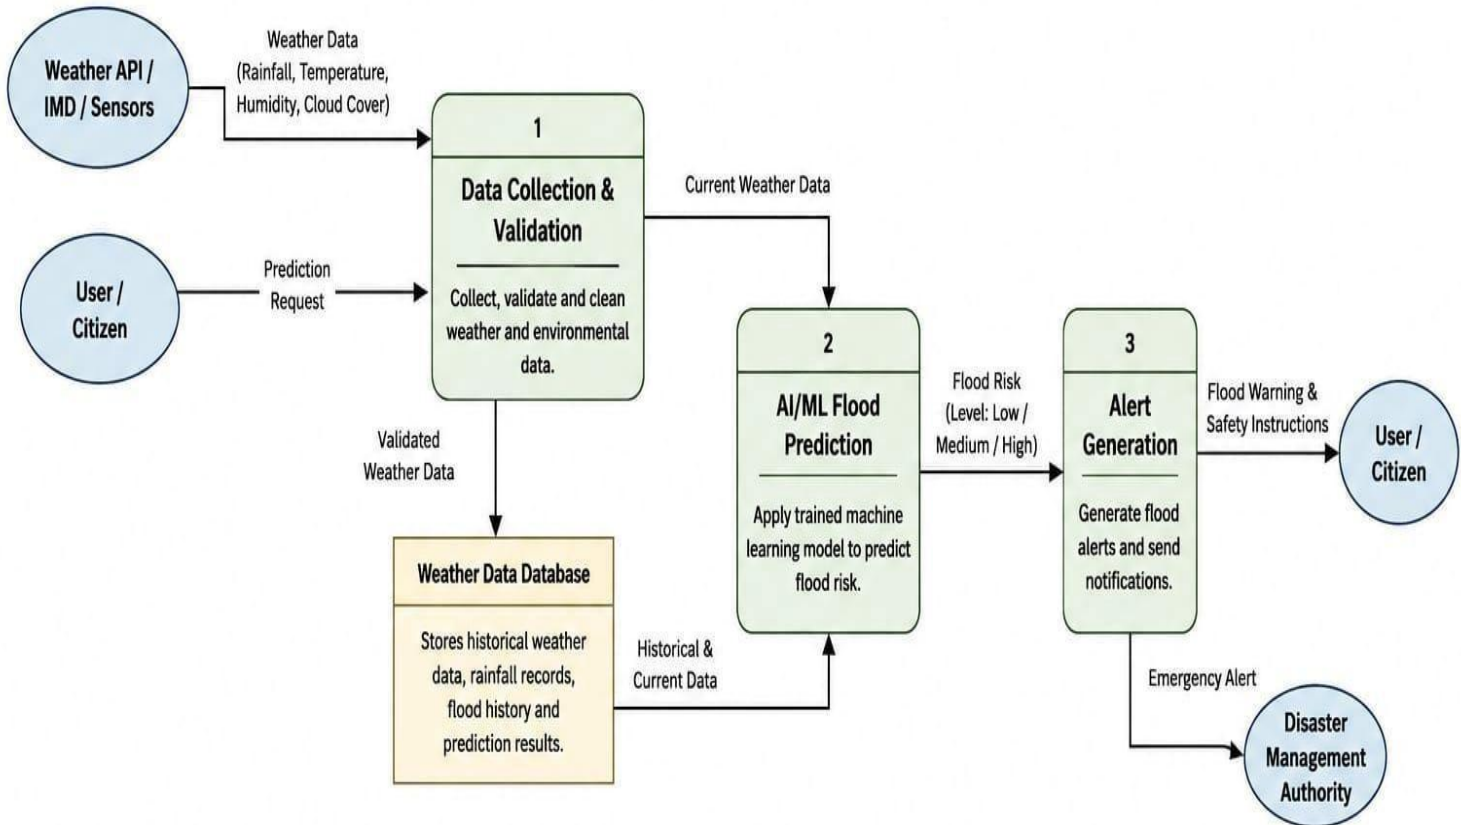

Rectangle (solid fill, no number)	Data Store	A place where data is held for later use (e.g., Customer Database, Inventory).
Labelled arrow	Data Flow	Arrow showing the data flow

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.

DATA FLOW DIAGRAM (DFD) – LEVEL 1

RIISING WATERS – AI/ML FLOOD PREDICTION SYSTEM

DFD SYMBOL LEGEND

Symbol	Name	Description	Symbol	Name	Description	Symbol	Name	Description	Symbol	Data Flow
	External Entity	A person, organization, or system outside the project that sends or receives data (e.g., User, Weather API).		Process	An activity that transforms incoming data into outgoing data (e.g., Data Collection, Prediction, Alert Generation).		Data Store	A place where data is held for later use (e.g., Weather Database).		The movement of data between entities, processes, and data stores, labeled with what data is being passed.
Oval / Rounded shape			Rectangle with numbered header			Rectangle (solid fill, no number)			Labeled arrow
