

Project Demo Planning

Date	04 July 2026
Team ID	
Project Name	Rising Waters
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction	Introduce the Rising Waters project, objectives, and flood prediction problem.	1	PM Priya
2	System Overview	Explain project architecture, technologies used, dataset, and workflow.	2	K. Vineetha
3	Machine Learning Model	Explain data preprocessing, model training, algorithms, and prediction process.	2	K. Shushma
4	Live Demonstration	Show login, enter weather parameters, generate flood prediction, and display results.	3	S. Deepthi
5	Results & Performance	Present prediction accuracy, model comparison, and output analysis.	1	PM Priya
6	Conclusion & Q&A Summarize the project, future enhancements, and answer questions.	Summarize the project, future enhancements, and answer questions.	1	All Members

Demo Flow Summary

Step	Activity	Notes
1	Introduction & Problem Statement	Explain the importance of flood prediction and the objectives of the Rising Waters system.
2	Solution Overview	Describe the system architecture, machine learning workflow, dataset, and technologies used..
3	Live Feature Demonstration	Demonstrate entering weather data, generating flood predictions, and explaining the results shown by the application.
4	Q&A Session	Respond to faculty questions about the project, machine learning model, system workflow, results, and future enhancements.
